DETAILS OF TESTED CAR

SPECIFICATIONS

Tested model	Subaru Legacy 2.0D, LHD
Body type	5 door wagon
Year of publication	2009
Kerb weight	1400
VIN from which rating applies	applies to all Legacies of the specification tested

SAFETY EQUIPMENT

Front seatbelt pretensioners	
Front seatbelt load limiters	
Driver frontal airbag	single stage
Front passenger frontal airbag	single stage
Side body airbags	
Side head airbags	
Speed Limitation Assistance	
Electronic Stability Control	
Seatbelt Reminder	

COMMENTS

Adult occupant

The passenger compartment remained stable in the frontal impact. Structures in the dashboard presented a risk of injury to the knees and femurs of the driver and front passenger, and protection of that body region was rated as marginal. Good protection was provided in the side barrier test and the car scored maximum points. In the more severe side pole impact, readings from the dummy chest indicated a weak level of protection. Marginal protection was provided against whiplash injuries in the event of a rear impact.

Child occupant

Forward movement of the 3 year dummy's head was not excessive in the frontal impact. In the side impact, the heads of both dummies were properly contained by their respective restraints. The passenger airbag can be disabled by Subaru dealers to allow a rearward facing child restraint to be used in that seating position. The dangers of doing so without first disabling the airbag are explained in a sun visor label which is permanently attached, but this label is not available in all European languages.

Pedestrian

The bumper offered good protection to pedestrians' legs in most areas. The bonnet also performed well in most areas likely to be struck by the head of an adult or a child. However, the front edge of the bonnet scored no points for the protection it offered to pedestrians.

Safety assist

Electronic stability control is standard equipment on the Legacy, as is a seatbelt reminder for the driver and front passenger seats.
