Car details

Tested model	Nissan X-Trail 2.0 dCi XE, LHD
Body type	5 door SUV
Year of publication	2007
Kerb weight	1646kg
VIN from which rating applies	301-009838

Comments

Front impact

The passenger compartment remained stable during the impact. Protection of the driver's neck was rated as 'weak' because of the extent to which it was bent backwards in the test. Structures in the dashboard presented a risk of injury to the knees and femurs of the driver and passenger.

Side impact

The X-Trail scored maximum points in the side impact and pole tests.

Child occupant

Maximum points were scored for the protection of the three year old, based on dummy responses in the frontal and side impacts. The presence of ISOFIX anchorages in the rear outboard seats was not clearly marked.

Pedestrian

The front edge of the bonnet scored no points for its protection of pedestrians' legs. The bonnet offered predominantly poor protection to adults' heads.
